THE BENEFITS OF HAVING A HEARING SCREENING

- A hearing screening is a brief test to detect if you have hearing loss. Should you have hearing loss, a full hearing assessment* is recommended.
- Everyone over the age of 60 should have a hearing screening. Even if you do not have hearing loss, a screening can be used as a baseline should you develop hearing loss later.
- Hearing loss can develop gradually. Early detection and treatment is important.

HearingLife is a national hearing care company that operates nearly 600 hearing care centers across the United States.
